# RayTemp ${ }^{\text {TM }} 8$ infrared \＆probe thermometer 

$\checkmark$ two－in－one instrument
$\checkmark$ includes differential \＆average temperatures
$\checkmark$ target ratio 11：1
$\checkmark$ range IR -59.9 to $+499.9^{\circ} \mathrm{C}$ ，probe -63.9 to $+1369.9^{\circ} \mathrm{C}$

The RayTemp 8 portable gun－shaped infrared thermometer is compact，lightweight and easy to use．Simply aim，pull the trigger and display the temperature of the item being measured．The LCD display gives a digital read－out of temperature over the range of -59.9 to $+499.9^{\circ} \mathrm{C}$ ．

The instrument incorporates a clear，easy to read，LCD display with low battery indication．The RayTemp 8 incorporates an auto power off facility that turns the instrument off after 60 seconds， maximising battery life．The unit features a laser dot alignment for ease of use．

The RayTemp 8＇s four－button keypad，allows the user to select ${ }^{\circ} \mathrm{C} /{ }^{\circ} \mathrm{F}$ and max／min．Additionally， the difference between the max and min temperature and the average temperature can be displayed．

## two instruments in one

The RayTemp 8 infrared thermometer incorporates a miniature thermocouple type $K$ probe socket that enables a wide range of type K thermocouple probes to be used for a variety of temperature measurement applications，including air，liquid and surface temperatures．For details of compatible type K thermocouple probes，please see pages 45 to 50 ．
